Grade Level: K-1000

### 1. What is the purpose of Reading Mastery?

Reading Mastery is a basal reading program designed to foster reading using a systematic, structured, teacher-guided approach.

### 2. With whom can it be used?

Reading Mastery was developed for children in kindergarten through to grade 6. It may also be used with children who are pre-K. Reading Mastery can be beneficial in students of all ability levels and can therefore be implemented on a whole-class or whole-school basis. However, it is both a preventative measure and an effective intervention for children who are at risk for reading difficulties, or who have reading difficulties.

### 3. What is the format of Reading Mastery?

Reading Mastery targets the development of five reading-related skills, in sequential order:

- **Phonemic Awareness**

Children are taught how to segment or break words down in their smaller sound-units. Continuous, high-frequency letters and sounds are taught first. Children are also taught how to blend phonemes together to form words.

- **Decoding**

Children are then taught to use what they have learned in decoding and spelling words. Reading Mastery uses a specific orthography at this stage, designed to aid children with decoding words. The orthography provides a "rule" about, for example, which letters are stressed and which are not. It is gradually faded out so that students read conventional letter-

formations after having sufficient practice with phonemic awareness.

- **Vocabulary**

The next step involves teaching sight recognition of common irregular words, i.e. those which cannot be decoded phonemically. It involves repetition and practice.

- **Reading Accuracy and Fluency**

Children read stories aloud which are primarily composed of words they already know. This is meant to foster both reading comprehension and a sense of success on the part of the student. A high emphasis on oral reading (vs. silent reading) means that students can be constantly monitored for reading the words correctly and quickly.

- **Reading Comprehension**

In the context of teacher-guided activities, children learn to answer questions about a story, as well as how to draw conclusions and make inferences about reading. Emphasis is placed on learning new vocabulary, understanding literal meanings, making inferences, and using reasoning strategies.

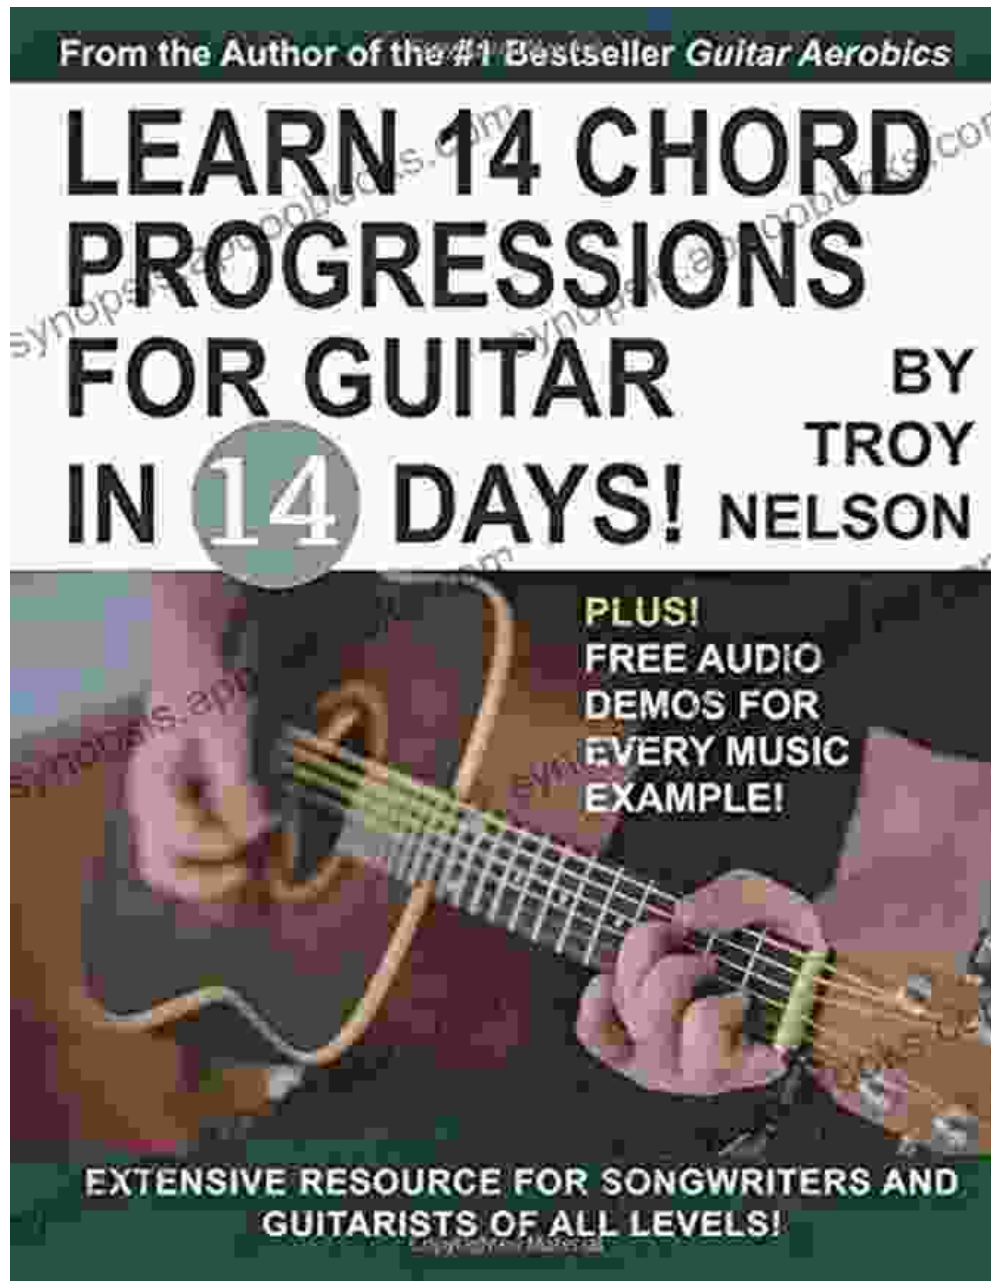

### 4. What teaching procedures are used with Reading Mastery?

Reading mastery is based on explicit instruction wherein the teacher models desired behaviour and attainable skills list for the students. This direct approach involves a carefully sequenced step-by-step approach, continuous assessment and immediate student feedback. Teachers have detailed handbooks with scripted lessons designed to be comprehensive for both the teacher and the students. Students are given practice opportunities and time to master new skills with the aim of developing fluency.
