Utility Drift

One of the most important concepts in The Theory of Business Enterprise is the concept of utility drift. Utility drift refers to the tendency of businesses to drift away from their original purpose. This can happen for a variety of reasons, such as when businesses become too focused on profit or when they lose sight of their customers' needs.

Utility drift can have a devastating impact on businesses. It can lead to decreased profits, customer dissatisfaction, and even business failure. The author argues that it is essential for businesses to resist utility drift and to stay focused on their original purpose.
