The Garrison Investigation

Navasky's book delves into the tumultuous investigation led by New Orleans District Attorney Jim Garrison, who pursued a controversial theory implicating a cabal of anti-Castro Cuban exiles, CIA operatives, and

wealthy businessmen in the assassination. Despite gathering a large body of evidence, including testimony from key witnesses, Garrison's investigation was met with skepticism and ultimately dismissed by the Warren Commission.

Navasky provides a thorough analysis of Garrison's investigation, examining the strengths and weaknesses of his case. He explores the challenges Garrison faced in gathering evidence, the credibility of his witnesses, and the political pressures that may have influenced the outcome of his investigation.

The Warren Commission

In contrast to Garrison's theory, the Warren Commission, appointed by President Lyndon B. Johnson, concluded that Lee Harvey Oswald acted alone in assassinating Kennedy. Navasky examines the evidence presented to the Commission, including the trajectory of the bullets, the eyewitness testimony, and the analysis of the Zapruder film. He also explores the controversies surrounding the Commission's findings, including allegations of a cover-up and the suppression of evidence.

Ongoing Investigations and Conspiracy Theories

"Kennedy Justice" goes beyond the Garrison and Warren investigations, delving into the numerous conspiracy theories that have emerged in the decades since the assassination. Navasky examines the various hypotheses, from the involvement of the Soviet Union to the role of organized crime. He analyzes the evidence supporting these theories and discusses the challenges of separating fact from fiction.

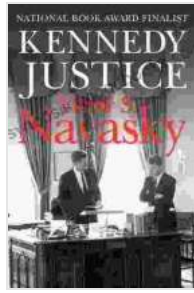

Navasky also explores the ongoing investigations into the assassination, highlighting the work of the House Select Committee on Assassinations and the Assassination Records Review Board. He discusses the declassification of documents and the emergence of new evidence that continues to shape our understanding of this historical event.
